Sy rolegraph to the Times.

NEW YORK, March 17.—[By the Associated Press.] The Evening Telegram says that notwithstanding all that is said concerning the anxiety of Mr. Cleveland to be renominated for the Presidency, the Telegram is in a position to announce on unimpeachable authority that the ex-President recently wrote a letter declaring that he would not allow himself to be put in nomination. No one but Mrs. Cleveland knew of the letter. Cleveland innomination. No one but Mrs. Cleve-land knew of the letter, Cleveland in-tended to make the letter public by the Associated Press. On the very day it was to be published Mrs. Cleveland saved the situation by sending for one of his most trusted friends. To this gentleman Cleveland confessed that he was sick of the littleness and bicker-ings and insults that daily infringed his private life: that he had made no effort private life; that he had made no effort to secure the nomination, and that nothing would induce him to enter the

Cleveland's friends induced him to promise that the letter would not be given to the Associated Press for twenty-four hours. A council was hurriedly held by the most faithful and level-headed of the Cleveland men, and at last Cleveland was persuaded to withdraw the letter.

draw the letter.

The Herald's correspondent at Lakewood, N. J., saw ex-President Cleveland tonight regarding the Evening Telegram story. "Why," said he, "I never dreamed of writing such a letter, and surely if I had penned such a letter I certainly would know something about it."

"Well, well," he continued, "so they say Mrs. Cleveland induced me to suppress the letter never written. That silly story is an abourd one, for the maio fact is that Mrs. Cleveland pever interferes in political matters in which I am concerned."

IOWA REPUBLICANS.

Clarkson Chosen a Delegate to the Na DES MOINES (Iowa,) March 17 .- The Republican State Convention met this morning. After effecting a temporary organization and the appointment of mittees an adjournment was taken till 2 p.m.

Mr. Struble, in an address, paid glowing compliment to Harrison's ad-ministration. Speaking of the tariff, he said that the Democrats had been dissaid that the Democrats had been dis-cussing raw wool for four months. At that rate when would they get through? The Republicans had a number of men who, as candidates, could succeed in November. Harrison himself was fore-most and James G. Blaine was second. The Democratic availables were limited to Grover Cleveland and David B. Hill, "Where is Boles?" shouted a dele-

The report was adopted without opposition and the convention adjourned.

HILL IN GEORGIA. The Senator's Spread-eagle Oratory Min-gled with Buffoonery. MACON (Ga.,) March 17 .- | By the As ociated Press. The train bearing senator Hill reached this city at 10:80 a.m. During a brief stop Hill held an interesting levee. Hill called the attention of the crowd on the platform to the fact that he was wearing St. Patrick's day colors. He urged all fellow Democrats to be true to the Democratic principles, and all will be well in the future.

ocratic principles, and all will be well in the future.

The party stopped at Wadley for dinner. As the train was pulling out the Senator said a few words to the crowd, closing with the admonition: "Vote the Democratic ticket and be happy."

On their arrival at Savannah the party was taken in charge by the Hibernian Society and escorted to the Desoto Hotel. There was a banquet this evening under the auspices of the Hibernian Society, at which Senator Hill responded to the toast, "Our Federal Union," saying in the course of his remarks that the late war may, ere long, be seen by South and North alike to be necessary to fuse our divided patriotic pride into common patriotic pride and cause that peculiar change which has at last transmitted an insoluble political problem into a soluble social problem. The true Democracy has survived; the people's rule has survived, and next November will wipe away its latest interruption.

"The Federal Union—it is our pride, our hope, our trust, our glorious heritage. Liberty and union new and for a service of the property of the people's rule has survived and next November will wipe away its latest interruption.

Oregon People's Party Convention. OREGON CITY (Or.,) March 17.—The People's party convention concluded its labors this afternoon, having placed a full ticket in the field for all State and full ticket in the field for all State and district officers. Resolutions were passed today favoring the St. Louis platform and opposing all capital and corporations. A fund was raised for the Reform Journal, and plans for careful and complete organization were perfected. The convention was harmonious throughout. Confidence was expressed in their ability to carry Coos, Josephine and Jackson counties, with chances in Lane and Linn.

The convention made the following nominations: Congressmen, First District, M. V. Rorke; Second District, J. C. Luce; Supreme Judge, D. Fright.

No Fusion in Michigan. Grand Rapids (Mich.,) March 17.-The Prohibition State Convention opened here this afternoon with 400 delegates in attendance. A scheme for fusion with the People's party was defeated at the outset. The rest of the day was occupied by routine matter. It is announced tonight that Cincinnati has been selected as the place of the national convention to assemble June 29.

Chicago.

Disclosures of His Doings in

Startling Revelations of Corruption Among City Officials. Wholesale Bribery of Members of the

Board of Aldermen.

ns and Evidence Secured That Will Prove Boodling Equal to That Which Thrived Under Tweed in New York.

By Telegraph to The Times. CHICAGO, March 17.—[By the Associ ated Press. ] As a sequel to the recent passage by the City Council of an ordinance granting permission to the Chi-cago Power, Supply and Compressed Air Company to use streets and alleys of the city in about any manner it sees fit, an indictment of a number of the aldermen by the grand jury for alleged boodling is promised. The City Press Association tonight says that bribery of the most flagrant kind will be shown Corruption and rottenness beyond the ideas of the most cynical citizen will be disclosed, and facts which make the proposition in Chicago's Council one worth hundreds of dollars of preliminary ex-

hundreds of dollars of preliminary expenditure will be shown up. Tomorrow evidence will be presented to the grand jury showing beyond doubt that certain aldermen have been paid liberally for their votes. The jury will listen to a tale of rottenness and corruption to which the boodling of the Cook County Commissioners was nothing.

The evidence has been in preparation for some time, and a mesh now incloses some of the city "fathers" from which there is little hope of escape. It includes the confessions of several guilty parties, which are said to be very circumstantial. The men who have been working up these cases have spared no expense and made sure of every step. They have witnesses who have seen large sums of money paid by every step. They have witnesses who have seen large sums of money paid by representatives of corporations to individual aldermen, and who have heard vidual aldermen, and who have heard aldermen promise to cast their votes on certain measures in a certain way. Some received money at their homes; some were paid in the city hall, and two are said to have sold their votes in the lobby of the Council chamber. The investigation, it is said, will end only when several of the present members of the Council are wearing strings. of the Council are wearing stripes in Joliet.

The gentlemen who are behind the prosecution issued an official statement tonight, which says, in part, that the proof acquired relates largely to various boodle ordinances and entangles four or five aldermen in what it will be very easy to show was a consultant. very easy to show was a conspiracy.
"We will have no difficulty," says the
statement, "in indicting and convicting
several well-known aldermen. It is

several well-known aldermen. It is not our desire to convict only the aldermen, however. We desire also to punish those guilty of bribing councilmen, and we will not stop this investigation until they are brought to justice, no matter to whose door the incriminating evidence leads." General Lieb, foreman of the grand jury, said tonight that they will begin the investigation tomorrow; that they have a complete chain of evidence torged around the boodlers and any who do not tell the whole truth immediately will be arrested for perjury as well as boodling. arrested for perjury as well as boodling. He added that some of the men who will undoubtedly be indicted have heretofore been supposed to be above such

practices. State's Attorney Longenecker said this evening that he expects to show that the Compressed Air, Northern Pa-cific and Economic Gas ordinances, three of the most important measures which have passed the Council for a long time, were got through by the purchase of votes for hard cash. "I don't mind saying," said he, "that there will be the biggest upheaval ever seen in this city when all the facts are finally made Mr. Longenecker added that he will

Mr. Longenecker added that he will be aided in the matter by three of the most prominent attorneys in the city, they having been employed by local newspapers who have had men assisting to make out a case against the boodlers. The State's Attorney also said that several aldermen would assist in the several algermen would assist in the inquiry in addition to those who have confessed that their votes were purchased. Several will testify to having been approached; others will tell of colleagues who openly boasted of receiving money. One alderman openly stated that he was certain that almost every alderman favorably connected every alderman favorably connected with the three ordinances named above was guilty of receiving money for his vote. This alderman said: "It is gen-erally admitted that it requires money to get an ordinance through the Coun-cil, and many members make no secret of the fact that they will not vote for an ordinance unless they are rewarded for so doing. In some cases the re-ward is in the shape of a trade in votes supporting some improvement in the alderman's ward, but in by far the greater number of cases the considera-tion is hard cash."

A STUDENT'S MARRIAGE

It Proved a Failure and Sent Him from Yale.

NEW HAVEN (Ct.,) March 17 .- [By the Associated Press.] Richard H. Johnston of Boise City, Idaho, a student in the Yale law school, has left town under peculiar circumstances. A few years ago, while a student in the academical department at Yale, he secretly married a young woman of this city. Later on the story leaked out and Later on the story leaked out and the young man was obliged to leave college. Later on Johnston entered the law school. It now seems that Johnston objected to his wife's associates and a week ago she left him. Within a day or two Mrs. Johnston concluded to return to her husband, but then he refused to receive her and immediately started for his home in the West.

Johnston was one of the brightest young men of his class and would have graduated with high honors in June. He was very popular. His parents are wealthy and influential people.

IN THE BEAUTIFUL

## San Cabriel Valley.

RICHARD GARVEY'S SUBDIVISION

Of about 1000 acres of his Famous Home Rancho in the San Gabriel Valley. This magnificent body of land lies within 5 miles of the city of Los Angeles, on the gently sloping foothills bounding the beautiful valley of the San Ga-briel on the south. The entire tract is now and has for years been

UNDER CULTIVATION and is susceptible of producing the Finest Oranges, Lemons, Limes and any of the deciduous fruits. There is, also, a limited acreage of Choice Alfalfa Land; also a small amount suitable for Walnuts.

A Full Water Right Conveyed to Each Purchaser.

to Each Purchaser.

The unusual frosts and winds of the past season left no mark of damage in this favored locality. See it now and be convinced.

The temperature as observed for a number of years shows several degrees warmer in winter and cooler in summer than any other part of the valley.

We are authorized by the owner to offer Choice of the 10 and 20 acre plats of the subdivision for the present at the flat price of \$200 per Acre.

Simply a conversation with the public, at least that is what we intend ours to be. We wish to talk to you through the medium of this paper just as if we were conversing with you. Suppose you were to meet us riding on a street car, and after you had paid our fare, you were to ask us if we had received our new goods yet? and what the new stock consisted of.

Here is what we would tell you: That in our opinion the styles for Spring '92 are very handsome and that we have taken great pains in making our selections; that our stock contains all the latest shades and fabrics, both for men and boys' wear; that we can fit the lean, the fat and the tall; that our prices are popular.

Ladies will please take notice that until further notice we will sell the Star Brand and Mothers' Friend Boys' Waists laundried, for 75c.

We have the best unlaundried White Shirts in the city for 50c; they are well made and double-backed.

CATARRH hroat Diseases, Asthma, Bronchitis and

CONSUMPTION Dr. M. Hilton Williams,

137 South Broadway, 1 Los Angoles, Cal By his Aerean system of practice, which consists of proper Medicated Inhalations and Compound Oxygen Treatment.

CATARRH.

CATARRH.

Catarrh is often regarded by the patient as a cold in the head, and he often expresses astonishment at his remarkable tendency to contract fresh cold. Indeed, he declares that he is scarcely free from one cold before he takes another, and he is always exceedingly careful; it is also a matter of surprise to him that the cold always seems to settle in the head and throat.

Asense of weariness is sometimes felt in reading, speaking or singing; hoarseness at times occurs, a sensation of dryness is felt in the throat, or it appears that some foreign substance as, for instance, a hair, obstructed the throat; there becomes a sense of languor and fatigue, the breath lessens on a little exertion, a short, hacking cough, a peculiar sound in clearing the throat, a feeling as though there was not roomenous in the chest to breathe. These and other symtoms occur after the disease has made considerable progress. Then it is a time when consumption is about to begin its dreadful work. Up to this point the progress of the disease may have been slow, and the patient may, in expressing his condent nope that it will "wear off," declare that he has had the catarrh for years and has not seemed to become much worse, and trusts he will "by and by" recover. But this delusion is the grand error which has peopled our cemeteries with consumptive forms, as all forms of catarrh end finally in consumption.

The Aerian system of practice is applica-

tion.
The Aerian system of practice is applicable to all diseases of the respiratory organs and by this system of practice every case of catarrh is curable.

PLANTS FOR THE WORLD'S FAIR. Special Donations: Asked from Southern California. The secretary of the World's Fair As-

ociation is in receipt of the following letter from Secretary Thompson of the California World's Fair Commission:

California World's Fair Commission:

Dear Sir: We herewith hand you a copy of list of plants and trees that Chief Samuels of the Horticultural department wishes donated to the department to be used for decorative purposes, the same to be treated as donations or exhibits. The name and address of the person furnishing them will be attached. This will present an excellent opportunity to advertise the source from which such specimens are furnished and enable the party to place his exhibit in position at little expense, as the department will pay all expenses of digging, boxing, removing to shipping stations and freight to Chicago.

It is necessary to know immediately where we can obtain the inclosed list of plants and we will be greatly obliged to you if you will let us know by return mail what you can supply in the collection.

The following is a special list of plants

"What about the report that the stockholders of the operahouse are going to bring a new manager here from Los Angeles?" was a question put to John C. Fisher this morning.

"Well," said that gentleman with a smile, "I know nothing about it. If they do they will have an immediate chance to pay \$6000 which the Chadbourne Furniture Company has advanced them. In fact, if they are ready to pay that over now, I will gladly resign and make way for any one they may choose to hire. They can get a manager for \$150 per month. I give my services for nothing, and the salary expenses of the operahouse are but \$100 per month. If the stockholders want to pay ont \$250 for managing the entertainments which I have already booked ahead for a year, why, they are at liberty to accept my terms."

CALLED ON TO STAND UP.

The District Attorney on "Republican's" Letter.

He Would Like to Know the Name of the Author.

And Will Then Prove Him a Most Consummate Prevaricator.

Mr. Guinn Replies to the Strictures of Mr. McLachian and Gives Some Inside Facts - A Question of

District Attorney McLachlan was seen by a Times reporter yesterday, and asked what he had to say in reply to Herald signed "Republican." He said: "I am too busy with my official duties to notice the effusions of any craven coward who has not the manhood or courage to sign his name to an attack of that kind, but if the individual who shields himself behind the henorable non-de-plume "Republican" will arise and make his identity known I will agree to prove him to be a consummate liar. I call upon him to stand up."

When asked if he knew who the au-thor of the letter is Mr. McLachlan said that he did not, though of course he had an idea as to who wrote it. So far, he said, he had been unable to find any one to father it. In this respect it re-minded him of the mule, that has no pride of ancestry nor hope of posterity.

Mr. McLachlan denied that he had
ever stated publicly or privately that
he owed his nomination and election to Hervey Lindley. Mr. Lindley had sup-ported him, as had other Republicans, and he had been elected by the votes of his party. He is under no obliga-tions to any one in the sense implied in the communication, but if he was he would not allow that to influence his official acts. He is the District Attorney for the entire people, and as such intended to do his duty to the best of his ability.

Those Insinuations. Los ANGELES, March 17 .- [To the Editor of THE TIMES.] District Attorney McLachlan, in his report to Judge Smith on the Whittier Reform School investigation, uses the following language:

guage:

I have examined Mr. Guinn with reference to the insinuations contained in his report, and he testifies that he knows of no evidence or facts upon which a criminal complaint could be made against any one connected with the management of that institution; that he could not swear to any such complaint himself, and the only proof to sustain an insinuation of criminal conduct on the part of any one existed only in his own imagination.

I testified to no such thing. I dis-

duct on the part of any one existed only in his own imagination.

I testified to no such thing. I distinctly pointed out to him theoevidence of the payment of a claim of \$750 on what I considered false representations. The facts of the case, stated as briefly as possible, are these: At a meeting of the trustees of the Reform School held May 3, 1889—Lindley and Sims present, Lowe absent—J. M. Damron, on promise of a fee of \$1000 and traveling expenses, was employed to accompany Dr. Lindley, Trustee Sims and Architect Young on their Eastern trip, as their legal adviser. At a meeting held September 3, 1889 (after the return of the tourists,) all that portion of the minutes of May 3 relating to the employment of Damron was rejected—virtually expunged from the record. At a meeting held March 18, 1890, it was agreed to pay Damron's claim of \$750 on condition that he receipt in full for all claims he might hold against the trustees or the State. When the claim was presented to the State Controller there seems to have been some difficulty in getting him to nay it. A claim was presented to the State Controller there seems to have been some difficulty in getting him to pay it. A copy of a portion of the rejected minutes relating to the employment of Damron was sent to the Controller. All mention of the \$1000 fee and the clause "to render such services as an attorney-at-law as they may require, etc.," was omitted. Clerk Lowe certified are the scale of the school the the fied over the seal of the school that the foregoing was "a true and exact copy of the instructions issued to J. M. Dam-

From the action of the trustees in rejecting all that portion of their minutes which related to the employment of which related to the employment of Damron I fail to see how he had any claim against the State. The clerk, when he certified that what he sent to the Controller was a true and correct copy of the instructions issued to J. M. Damron at a meeting of the trustees held May S, 1889, certified to what was not so, for the trustees had repudiated both their instructions and the employing of Damron. The claim was paid on false representations. I stated this to Mr. McLachlan. He said there was nothing criminal in that; then asked if I would swear out a complaint against Clerk Lowe. I told him most emphatically that I would not. As it would fall to him to prosecute the case, and as he had told me there was nothing in it, I would have been rather verdant to swear to a complaint under such circumstances.

Mr. McLachlan says that from his inc. Damron I fail to see how he had any

swear to a complaint under such circumstances.

Mr. McLachlan says that from his investigation he finds that "the last grand jury never adopted any report of Mr. Guinn on the Whittier Reform School, and that no report of his ever formed any part of the grand jury's report to the court." If this is the case, what has he been investigating? Why did he summon numerous witnesses and append valuable time, for which the did he summon numerous witnesses and spend valuable time, for which the county pays him liberally, in pursuing an ignis fatuus. I was not aware that the grand jury adopted an expert's report. They did use material from my report in their report to the court, but used from it rather sparingly. It was too strong to suit the taste of a majority of those "fair, honorable men" whom Mr. McLachlan compliments so highly—men who could roundly censure the library officials for allowing the library in \$150 traveling expenses and the library officials for allowing the librarian \$150 traveling expenses and the girl attendants a few nickels for car fare, but could find nothing but commendation and praise for the Reform School trustees who allowed Sims & Damron \$1500 for traveling expenses, although one of these men had no official connection with the school and the other was out of office months before the school opened.

J. M. Guinn.

[Not to speak of suppressing entirely the criminal developments touching Trustee Sims, the bribe-seeker.— ED.

After suffering for years with stomach trouble I was at last induced to try Dr. Wong Him, of No. 689 Upper Main street. Los Angeles. He examined me and pronounced my trouble tumor in the stomach. After two months' treatment, during which time I felt greatly relieved and benefited, he pronounced me entirely curred, and from that time to the present, which is four months, I have not felt the least return of my old trouble. I am able to eat many things which formerly would distress me very much. Therefore I feel that I can do nothing else than to recommend the doctor to all who can be induced to try him. AMUSEMENTS TONIGHT. AT THE OPERAHOUSE - Wanted - The Earth.

TEN pairs of Chinese pheasants have been liberated on a farm near Baker City (Wash.) The birds are beautiful in plumage, and it is hoped their numbers will increase as rapidly as has been the case in the Willamette Valley.

THE blizzard which has prevailed in the West for the past few days has extended away down into Texas. The peach trees with precocious blossoms have suffered severely. California may as well prepare to supply the country with deciduous fruits this year.

THE TIMES yesterday called upon the oxcited Oxpress to produce an interview with Mr. Hervey Lindley on the sensitive subject of the Whittier Reform School. The Oxpress failed to show up with its interview. We again call for the previous question, to-wit: that in-

THE Independence Belge, the principal newspaper of Belgium, said in a recent issue: "Every incident which intensifies the dissensions of the Republican party and diminishes the probability of the control of affairs by that party for a new term of four years must assist in strengthening in the United States the cause of free trade, which today is more than ever necessary for us." That is looking at matters from the standpoint of Belgian prosperity. How does the converse strike the people of the United States?

SEVEN-YEAR-OLD ROSA DANCER of Philadelphia has confessed to a magistrate that a charge of criminal assault made by her against her uncle, Simon Taplinger, was without foundation, and was brought at the instigation of two women who had quarreled with Taplinger, and took this method of getting Los Angeles had a similar case within the past year. A heavy penalty should be meted out to people so utterly lost to a sense of justice and decency as to resort to such methods. Character-wrecking is almost as bad as trainwrecking and imposes irretrievable injury upon the innocent.

A Washington dispatch, unfavorable to the fortunes of Maj. Bonebrake, is printed this morning. It is said the President has decided not to appoint him Minister to Japan. If true the result will show a "falling down" tend-ency on the part of Mr. Harrison that is not creditable to a President who knows Bonebrake personally and favorably, and who owes much to California, to Southern California especially. Certain trumped-up charges against the applicant have doubtless swelled into the "bogie man" whose awful presence has caused the wearer of his grandfather's hat to tiptoe to the rear.

REV. JAMES B. HOLLOWAY Writes to THE Times concerning the publication of daily religious newspapers, under the auspices of the Methodist Episcopal Church, as follows:

The "daily religious paper" is not an experiment with the great quadrennial body referred to (the General Conference.) From its very incipiency Methodism has always utilized the press, as far as it possibly could, to the furtherance of all its insibly could, to the furtherance of all its interests; and, for a quarter of a century, nearly, has published a daily morning paper, six days in the week, in connection with its quadrennial General Conference. Sunday is "bridged" by the editors working, with all other hands, up to 11 o'clock Saturday night, and beginning again on Monday morning at 1 o'clock. Not a line is written or a type touched during the twenty-four Sabbath hours. We simply write this for information, and to correct any false impression which may exist.

THE threatened coal famine in En gland as the result of the great strik of laborers bodes no good to English industries and will probably produce much loss and suffering. Coming se soon after other reactions in mann factures and trade due to England's silurian free trade policy, and the greater advantages of competing nations, it is likely to cause widespread discontent among the English middle and lower classes. In the midst of this we may expect a political reaction and the downfall of the Conservative party Upon all this America may look with complaisance as a nation, but with pity for the individuals who suffer. For her system of political economy which invites these reverses the English alone are responsible. They have made their own bed and they must lie in it.

THE State of Missouri has a Demo cratic Legislature and that Legislature is gerrymandering the State in the most approved style of the art. That our readers may fully appreciate the inherent iniquity of this sort of political filibustering, which seems to have been adopted by the Democratic party as its general policy, we reproduce today from the columns of the Kansas City Star (an independent paper with Demo cratic leanings) an article giving a dia gram of one gerrymandered district, and what the Star thinks of it. It is proper that the people of this State ould be fully posted as to the tactics adopted in other portions of the Union, if the Legislature of this State should happen to be Democratic one of these days, such a gerrymander as this these days, such a gerrymander as this would be the thing that we must expect. It is by gerrymandering and Michiganizing such States as they may chance to control in the North that the Democrats expect to divide the vote of those States, and, backed by the solid South, capture the national administration.

His Eminent Qualifications

If there is a single topic which is funnier than another when handled by contemporary, the Herald, that topic is David Bennett Hill. Whether the particular fervor with which the editor of the Herald writes of the Demo cratic saint with the ear-marks of victory and a nimbus encircling his brow (betokening a sure winner) comes from a certain frame of mind, or whether the frame of mind comes from the fer vor, it would be hard to state. It seems to us that they are evidences of a particular Hill brand. If so, it must riva that celebrated "pine-top," which leaves a dark-brown taste in the mouth and a luridness of ideas beyond descrip tion.

In the Herald of yesterday appears an editorial paragraph which is worthy of dissection and discussion "line upon line, and precept upon precept." may be pardoned, therefore, for quoting it a sentence at a time, so that its full force may be appreciated. It begins thus:

After an enervating sequence of pusil-lanimous statesmen. David Bennett Hill presents an ingratiating picture to every true American.

Such a sweeping denunciation of a whole sequence of statesmen, Democratic as well as Republican, is rarely to be found, even in the most partisar of Democratic organs. With one grand wave of the hand the Herald dismisses them as pusillanimous. Go to, thou forward upstarts! One cometh after thee whose shoestrings thou art un worthy to tie in a bow-knot. There is a sturdy, trenchant ring about all of his utterances that strikes home.

Just so. While Senator Hill leaves his place in the United States Senate vacant, thereby dodging a commitment on the silver question, ignoring his official duties and swinging around the circle of the Solid South on a campaigning trip, he deals out political taffy of a singular directness and force. When questioned as to the silver issue he says: 'Let's not cross that bridge till we come to it." And all the while he takes good care not to come to it. What a master mind, to be sure, and how the sturly and trenchont ring of that utterance strikes home!

The inspiration of Tammany and machine rule; of a stolen State Legisla ture by the aid of partisan county officers and a manufactured court-the inpiration of treachery, by which comed the Democratic nominee for President at the last election—the inspiration of the gerrymander and the Michigan trick, of a "snap" convention and all of the "skullduggery" to machine politics! And how he will round out this eventful century in which so many pusillanimous politicians have

figured!

With Mr. Hill at the helm every American would feel certain that the American flag will be respected; that the Monroe doctrine will be revivified and vitalized by a man who has the courage of his convic-

But why the Monroe doctrine any nore than the Schleswig-Holstein ques tion? The country is not torn up about the Monroe doctrine. It has been affirmed and reaffirmed by the Republican as well as Democratic administrations. 'In President Harrison's recent message to Congress on the Chilean sit nation he gave it one of the strongest indorsements that it has ever received. There is no party division on the sub ject of the Monroe doctrine. Why should the man called upon by destiny to round out the century have to se the minds of Americans at rest on this unquestioned issue while he is dodging the silver question? Why should he have to make the American flag re spected? As a matter of fact, is Hill the man to make it respected at home

or abroad? He will waste no time with the abstruse profundities of an astute school of diplo-macy, but will deal in ultimatums.

In other words, he will go off half

and Rhodes, of course-in that portion of their majority report which so stren uously urges the "immediate" construc-tion by the city of headworks for a new municipal water system, for which purpose the voting of \$500,000 in bonds is recommended. It can hardly be pos sible, however, that the authorsoof the majority report-who are understood to be Messrs. Beaudry, Wood, Smith, Rhodes and Innes-would knowingly recommend the construction by the city of a system of headworks, without any corresponding system of "tailworks," so to speak, and thus leave the door open for private schemers to come in, sooner or later, and gobble up the source of supply-the river itself.

A Prosperous Fruit Season Ahead, It begins to look as though we are booked for a repetition of the exceedingly prosperous deciduous fruit season two years ago. The blizzards and cold waves which swept over the country east of the Rocky Mountains from the 10th to the 14th inst. covered a wide extent of country, going much further south than usual. They succeeded a warm spell, in which the grass had put forth and trees had bloomed in southern and middle latitudes. A cold wave coming at such a time is sure to make havoc with the fruit buds, and it will be no surprise to learn that the Eastern fruit crop is practically done

At the same time we are promised an unusually bountiful yield of deciduous fruits in California. Every alternate year brings light crops, and last year was the off one.

It seems rather ghoulish to be counting on prosperity based on other peo-ple's misfortunes, but if that is the way nature has decreed it we can but accept the issue with good grace. Owners of fruit orchards should make every preparation to cure their surplus fruits in the best manner possible and take full advantage of their opportunities. Canning and drying establishments also are justified in planning an active campaign.

There should be more attention paid to the drying of fruit in such a way as to make it free from dust and insect larvæ, and to putting it up in neat and convenient packages. If our dried fruit could be relied upon to carry over another season Eastern dealers would take hold of it with more confidence, and prices would rule better. Excessive sulphuring and open-air dry ing are methods which might be aban doned with much benefit to the output.

If, as circumstances seem to indicate we are in for another "ten strike" in fruits, it will go far toward covering our losses on the orange crop, livening up horticultural interests and promoting good times generally.

THE gifted Oxpress prints an alleged interview with ex-Mayor Workman, in which it makes that gentleman say:

which it makes that gentleman say:

If now is the proper time to acquire the works of the existing companies, which I think it is, a proposition should be made at once to arbitrate on the value of those works without waiting six years for the contract with the City Water Company to expire. I am in favor of the city owning its own works and against the fifty-year syndicate proposition. I think the Express' counsel in the matter is right; there should be no haste. I think the time for the payment of the debt should be longer than that provided by the existing law for issuance of bonds. Twenty years with one-twentieth part of the debt set aside each year is too short a time. I think the bonds should runthirty or forty years and that the law in this particular should be amended.

Of course this alleged interview is a

Of course this alleged interview is a 'fake." We are not willing to believe that Mr. Workman is so ignorant of the Constitution of his own State as not to know that "the twenty years' limit" of onds is fixed by the Constitution, and that any change of the law would require five years from the present time efore such a change could be made effective. The ex-Mayor of this city knows the Constitution too well to have made such a blunder. He never said it in the shape reported by the Oxpress in its bogus interview.

THE Press of Philadelphia is making a vigorous campaign against the proposition to deface Independence Square in that historical city. It is proposed to build'a monument of the Society of the Cincinnati on the square. The monu ment is intended to be sixty-five feet in height and, as the Press shows, would completely overshadow the old State Honse, which is of moderate proportions The whole country has an interest in the historical old building which is a mon ument to the patriotism of America and of Philadelphia. The protest of the pa triotic men and women of the Nation is against the hand that would deface th historic spot and obstruct the view of the historic building. If Philadelphia must have a monument for the Society of the Cincinnati there are other available sites for it. If not, the monument

After recounting the various legal steps in the trial and sentence of Freeman and the petition sent by the Jus-tices of the Supreme Court for commu-

I fully realize the fact that the case has passed beyond the power of the courts, and whatever may be the individual connection of any member of either tribunal regarding the guilt or innocence of the defendant, such member is powerless to prevent the execution of the judgment as it now stands. According to the law the Governor of the State, and he alone, is clothed with that power, and the responsibility which devolved upon the jury who tried him, and whose province it was to fix the penalty, is now transferred to me, and I am called upon to determine whether the judgment shall be modified or allowed to go into effect as rendered. The Bill to Provide Defenses for San Diego ceedings in the Senate

Vashington, March 17.—[By the Associated Press. | The tariff debate in the House this afternoon thrashed over the old straw and was on the whole, uninteresting. It is getting to be quite the thing to furnish illustrations and Mr. Bowers of California today excelled other producers by bringing into the House a fifty-pound block of tin, made in California, for the purpose by ocular demonstration of adding force to the statement of Representative Payne of New York that the United States would

be able before long to supply the domes-tic demand for tinware. The debaters today were Messrs. Payne of New York, Rayner of Maryland and Ellis of Kentucky. The dryness of the debate was varied by Mr. Bowers' block of tin, the varied by Mr. Bowers' block of tin, the production of which induced Mr. Harter of Ohio to take a hand in the discussion. He plied Mr. Payne with a number of questions until the latter himself assumed the role of questioner and asked whether Mr. Harter had received a reply yet from Senator Hill. [Laughter.] He hoped when Mr. Harter heard from Hill on the sliver question he could also tell that contieman's views from Hill on the silver question he could also tell that gentleman's views on the tariff. A New York Senate Committee Thinks is Means Higher Prices. ALBANY (N.Y.,) March 17.—[By the Associated Press.] The special committee to investigate the coal deal made its report today to the State Senate, setting forth what has been learned regarding the combination of railroads. The report says that it was claimed strenuously on the part of the companles in interest that there was not now nor would there be hereafter any desire to increase the price to the consumer,

but it is plain to the committee that this is a matter which would rest largely in the discretion of the companies.

The committee was continued with authority to report during recess in order that middlemen and some large dealers may be heard. LIVEBPOOL, March 17.—[By Cable and Associated Press. The excitement caused by the discovery of five bodies buried under the floor of a house at Rainburied under the hoor of a noise at team-hill continues. Further developments in the case are eagerly awaited. It has transpired that before coming to En-gland Williams, the man whose arrest at transpired that before coming to England Williams, the man whose arrest at Melbourne led to the unearthing of the bodies, was living in Sydney. Shortly after he left that city his wife and four children disappeared, and it was supposed they had followed Williams to Eugland. Rumors of his intended marriage to a young girl named Matheson had reached Sydney, and it was naturally supposed Mrs. Williams had left for Liverpool to prevent the consummation of this crime. The police expect to prove that the bodies found yesterday are those of the wife and children and that Williams killed them in order to carry out his intention to marry Miss Matheson.

It is believed that Williams married Miss Matheson at Beverly in 1890, assuming the name of Harry Lawson. He then described himself as a large farmer in Australia. He gave a number of valuable presents to Miss Matheson. He deserted her and absconded to South America. Miss Matheson swore out a warrant charging him with the theft of the presents he had given her. He was arrested in Uruguay and brought back to Hull and sent to jail for nine months. During the time he was in prison it was ascertained that he had married and deserted a lady in

Today a gardener, who lives next door to where the bodies were found, recog-nized the eldest body as that of a wo-man seen in the backyard of the Din-ham villa on Angust 9 last. On August 10 he heard the children screaming. He pald no attention to it, thinking that perhaps some of the children were hurt. He never saw the woman or children afterwards.

He never saw the woman or children afterwards.

Another man recognized the body as that of Marie Deening, who had been an employé of a Liverpool fishmonger. Williams married her under the name of Deening, at the time describing himself as a mining engineer. Williams and wife afterward went to Hull, where Williams was arrested and convicted of forgery and sentenced to a year's imprisonment. Being discharged he married a young woman in Hull, deserted her and returned to Marie. Accompanied by Marie, Williams went to Cape Town and then returned to Birkenhead. It is now learned that Williams' proper name is Deeming. He has a brother who resides in Birkenhead, and who was sammouded to attend the inquest today on the bodies of the woman and four unfortunate children. He hears a striking resemblance to the murdeer and had a narrow escape this afternoon from lynching at the hands of a growd. The murdeerer has always been of a restless disposition. He married the woman Marie James in 1880 and she accompanied him to Australia, and remained in that country a number and she accompanied him to Australia, and remained in that country a number of years and returned to England in July last, bringing with her the four children. ### A FRENCH DUEL

The Socialist, Marquis de Mores, Fatally
Wounds Editor Isaac.

Parts, March 17.—[By Cable and Associated Press.] The duel between
Marquis de Mores and M. Isaac, which derquis de Mores and M. Isaac, which courred yesterday, seems to have been eliberately brought about by the former to gain popularity with the Socialists by drawing a challenge from the san charged with having their comades shot down at Fourmies. The arquis wrote a letter, arraigning acc for the Fourmies affair, where-son Isaac sent a friend to challenge

him.

"Monsieur de Marquis," began the messenger. "Do not call me Marquis!" exclaimed that gentleman. "I am a citizen, one of the people."

The messenger delivered the challenge. "Tell losac," replied the Marquis, "that one of the people is ready to meet the man who slaughtered his brothers; that he chooses awords for weapons, and that the duel be fought to the death."

From the first the Marquis pressed the disting. Isaac held his own bravely, but was no match for the altified impetuosity of his antagonist. The Marquis evidently meant to kill him and Isaac knew it. It was by a skillful feint that she Marquis succeeded in disaming his man. He made a darnet as if at the left breast, and as

Isaac made a motion to parry the blow the Marquis, with almost inconceivable swiftness, struck flereely to the right, plunging his weapon into the breast of Isaac. The latter staggered, blood pouring from the wound. He held onto his sword and made a motion as if to attack the Marquis again. The latter stood calm and turned to his seconds and asked for a cigar. It was handed to him, and he quietly lit it while the condition of Isaac was being examined. The attendant surgeons pronounced the wound dangerous, possibly fatal, if not speedily attended to. They staunched the flow of blood and advised that Isaac be conveyed at once to some place for treatment. Isaac staggered to his feet and insisted on continuing the fight. "It was to be a duel to the death!" he said, "and must go on." The seconds held a consultation and decided to stop the fight, evidently to the Marquis' disappointment. The Socialists are making a hero of the Marquis. Isaac is said to be in a very critical condition. condition.

### ST. PATRICK'S DAY.

The Balls at Illinois and Turnverein Halls Well Attended. There was no public celebration of St. Patrick's day, yesterday, beyond the fact that most of the adult male popu-lation sported green ribbons in their

outtonholes. The charity ball given at Illinois Hall The charity ball given at Illinois Hall last evening was well attended and quite a success financially, upward of 300 tickets being taken at the door, while the number sold will reach much higher. The affair was under the auspices of the Veterans' Alliance, and the proceeds will be used to meet the wants of seyeral worthy old soldiers who are sick and in need of some such assistance.

Turnverein Hall was packed last evening, it being St. Patrick's night and the occasion of a benefit ball tendered Mrs. W. J. Flatley, whose hashand died some time ago, he being formerly in the employ of the Southern Pacific.

Wright, chief engineer, and his day denied the application, holding that at the date of the swamp land act in 1850 the lands in question formed part of the bed of the lake, and hence were not included in the lands granted. He holds further that while the Surveyor-General has been made the tribunal to determine what lands were swamp at the date of the grant, his jusisdiction is confined to the lands that actually existed at the date of the grant, his jusisdiction is confined to the lands that actually existed at the date of the grant, and therefore his approval of the plots of the survey in this case can have no force on the department.

To Test the Validity of Reciprocity.
Washington, March 17.—The Evening Star says:

It is possible the President's proclamation reimposing duties on certain imports from Veneguela, Hayti and Colombia will lead again to a test of the validity of the reciprocity clause of the McKinley bill. The proclamation opens the way for a direct question to be brought before the House and it will be the policy of those who are interested in discrediting the McKinley act to avail themselves of the option of the face. It was the law of the camp, so Spencer says, that no man should shave until the job was done; use as little water as possible below the collar line, abstain from eigarettes, talk Spanish or nothing during working hours and swear by the metican flag.

Several men of this party turned back at Alamo, where they will seek yellow money for a while.

It must be startling to the numerous Americans who have invested their money in Florida orange groves to hear that the Italian Minister of Commerce, who has been inquiring into the Ameri-can production of oranges and lemons, has decided that Florida soil is not suit-

can production of oranges and lemons, has decided that Florida soil is not suitable to the growth of oranges. Among the individuals whom we know to have invested money in Florida orange groves we cannot recall one that grew rich. As a citrus country Florida is officially and practically taking a back seat. As a winter resort Florida is today playing sec ond fiddle to Southern California, as a summer resort it was always a failure.

The people of the United States are today looking to California as the great fruit State of the Union from which to draw their supplies of fresh, canned and dried fruit. They are also looking to California as the great winter resort, possessing the finest climate in the world. They are looking to California as the State to furnish them train-loads of oranges. And now the Italian government declares that California is the only place on the green earth that they only place on the green earth that they need fear as a competitor in raising citrus fruits. In the near future California will command the market of the world, having left ancient and modern Rome and her succeeding country far behind in the great citrus race.

# ONE \* THOUSAND \* DOLLARS!

We understand that some people refuse to believe that Meyer Lewis has actually sold out to us; that our present Gigantic Closing-out Sale of Lewis' Stock is a "fake;" that he is still connected with this establishment. Now to settle this question once and for all, we have deposited in escrow with the Farmers and Merchants' Bank a check for One Thousand Dollars in favor of the Ladies' Benevolent Society of Los Angeles, and will gladly pay the same to that benevolent institution if any man, woman or child in this city can show in any manner whatever, that Meyer Lewis has not sold out to us; that he is in any way connected with this establishment, or has any interest or voice in the management of this business. We are eager and anxious for some one of those who make these assertions to prove their claims and compel us to pay out this money. If there is anyone who can prove this we are willing to forfeit our money and stand convicted in the eyes of the public as branded liars unworthy of public confidence.

## ☆ BUT, NO! ☆

## Truth is Mighty and Must Prevail!

Our greatest aim is to attain the public's confidence. Truth is written in every line of our advertisements. Truth is stamped on the face of every bargain. Words of truth fall from the lips of every salesman. Every bargain bears a genuine label, and every purchaser leaves our house satisfied we are truthful, acknowledging the truth of our advertisements and rejoicing in their good fortune. We know not and we care not what the people thought of Lewis' store. We know Lewis bought for cash, bought cheaply, discounted his bills, and sold his stock to us for half its value. We know we are enterprising enough to secure it; we have paid for it, it is ours; we are selling it for whatever suits us. We desire to do business in a different manner; we don't want Lewis' goods in the house; low prices move them, and the prices we place on them cause them to leave our house in vast quantities. To our fellow retail dealers we say — We are one of you; we realize you condemn us for slaughtering goods well bought, but we are doing business for the glory of building up a big business, and notwithstanding your disapproval we will even give them away if necessary. To the Public we say — The time has come, the hour is here; grasp this opportunity while you can, it may never come again.

After the male members of the Prohibi After the male members of the Prohibi-tion element have expressed themselves as satisfied with the present status of the liquor question, and after a paper has been signed by about 100 representative citisens, including a minister and prominent lay-men, approving the nominees of the citi-zens' convention, the lady workers in the temperance cause, in convention assembled, express themselves as being of an entirely different turn of mind, as is shown by what follows:

LADIES SCORE COUNCILMEN, DRUGGISTS, ETC.
At a meeting of the Woman's Christian
Temperance Union of Pasadean held yesterday, the organization decided to put itself
on record on the following points:
"In amending city ordinance 125 in the
manner they have done we hold that the
City Trustees have been untrue to the
pledge they gave the public in these words:
That we will do no omclal act that will
permit or encourage the promiscuous sale

"If the opinions of women are included in 'public sentiment' we do not believe the public sentiment of Pasadena is in favor of the ordinance as it new stands, and if the public sentiment of the men of this city davors thus paving the way to high lifense it is time for all who call themselves temperance people to band together to educate public sentiment to a higher standard.

"The difficulties in the way of enforcing a prohibition ordinance in Pasadena have been unnecessarily caused by druggists, hotel and restaurant keepers.

"In what sort of a position do these few men place themselves to thus endanger the temperance interests of a whole city by a so-called liberal construction of the term 'medicinal parposes,' and for the sake of giving a too-thirsty guest liquor with his meals". The above resolutions were signed by Sarah J. Allen, president, and 'Alice H. Farey, secretary.

A NEW CANDIDATE.

Rev. Mr. Harris and J. B. Stoughtenburgh were circulating a petition yesterday advocating the nomination of W. S. Vore for City Treasurer. As a result. Mr. Vore, who has filled the office during the past two years, will no doubt be a candidate for reelection against W. U. Masters, who was declared the nominee of the citizens' convention, held last week, by a unanimous vote. This will probably be the only office on the list over which there will be a contest.

At the usual Wednesday evening gathering at El Retiro rather more guests than usual were present and a merry good time enjoyed, either in indulging in the revelry of the dance or posing for pictures on the stage or grouped together in the hall, listening to songs to accompaniment of guitar and banjo. The good-night chorus was prolonged by the party until they reached their homes in different parts of the city, and it is to be hoped the slumbering citizens did not mistake it in their dreams for an awakening good-morning chorus.

A bee's wings vibrate or beat the air at the rate of 190 strokes per second. Scientists claim that 190 strokes per second would propel the bee forward at the rate of a mile per minute. Conservative writers admit that their velocity is at the rate of at least thirty miles per hour. Basing our calculations on the latter figures and supposing they can keep up for twenty minutes, no matter how heavily laden on the return trip, the rate of speed on the outgoing would take them ten or twelves from the home hive.

RIVERSIDE.

In municipal elections Riverside has not been in the babit of dividing upon the old party lines. If there has been more than one candidate up the voting has been determined by other than political party bases, usually by some local issue upon which there was not a split in party lines.

It has been thought that there would be no issue of moment upon which there could be two sets of nominees for the coming municipal election. But recent developments have shown that there is to be a question considered upon which there is a decided difference of opinion. The question of granting franchises to private individuals for rights-of-way through the streets for steam railways is the one upon which much depends in the coming election. It is thought that certain individuals are endeavoring to secure such franchise for speculative purposes, and not for the purpose of building and operating roads over the lines specified. This proposition is opposed by a large number of individuals. The Trustees now stand three for and two against granting the franchise. The two opposed to it will retire at the coming election, both refusing to be candidates to succeed themselves. Should those wishing the franchise succeed in electing one new member in favor of the franchise it would give the necessary two-thirds to carry the day. The question is looming up as the important one in the coming spring election, and considerable activity is being shown by friends of both sides of the matter.

The City Trustees had a long session Wednesday evening, it being nearly 2 o'clock in the morning when an adjournment was reached.

The amendment to ordinance No. 20 was taken up and a long discussion followed, resulting dually in tabling the whole matter. Ordinance No. 20 is the prohibition ordinance. Some weeks ago an amendment was introduced permitting hotels with twenty we great rooms to serve

wines to guests upon their tables. This was subsequently amended to give this privilege to all hotels. When the matter came up on Wednesday night it became apparent that the restaurants were going to become hotels in some way and thus secure the privilege of serving wines. No doubt some of them would, therefore, become saloons of the worst type. In view of this prospect the amendments were laid upon the table and virtually killed.

The storm water bonds are soon to be issued, and the Cierk was instructed to place advertisements for bids for publishing them in the Citrograph, The Trues and a New York and New Haven paper.

The State Board of Health requires of all local boards of health records of all births and deaths. These have not been reported to the city board. Steps are therefore being taken to compel all physicians to report all cases of birth or death.

The vacancy in the city offices caused by the resignation of I. M. Hough was filled by appointing J. A. Stone Street Superintendent, with a salary of \$3 per diem for each day's service, and requiring a bond of \$500. Several other matters of importance were discussed.

cured and the City Attorney has excused one by peremptory challenge and Westerman and Roberts five. One of the attorneys said yesterday that the time was spent in "speechifying" and arguing before Judge Morton. At the close of the proceedings a petition was handed Judge Morton, which read as follows:

"To the Hon. Judge Morton: We, the undersigned people, summoned as jurors in the Copeland case, feel that you have the power to select the jury without keeping 100 men waiting to listen to the wrangle of the attorneys in the case, and we feel that it is doing us an injustice to so allow it to proceed. Therefore we, the undersigned, ask that you do your duty to us as well as to the defendant in the case to stop all unnecessary proceedings."

that you do your duty to us as well as to the defendant in the case to stop all unnecessary proceedings."

The petition had about forty signers. Once or twice Judge Morton said yesterday "It is our modesty that prevents us from calling on the attorneys to stick to the points involved. These speeches are very nice to listen to, but hereafter they must stick to the question."

R. A. Hall, one of the venire summoned, said to The Times reporter yesterday: "Westerman asked me 'Did not you do what you could to get me in the penitentiary? to which I answered 'No. I did not.' Westerman said: 'Wouldn't you be heartly glad to get me in the penitentiary?' 'No; but I believe you ought to be in the penitentiary, and would be if you had your just deserts.' He said: 'You perjured yourself to get me there,' to which I said: 'You are a liar in truth and in fact.' If then said to the Court: 'If you don't protect me I will protect my self.'"

One of the most frightful accidents that has taken place on any of the street-car lines in this city for some time past occurred at the corner of Spring and First streets at 8:15 o'clock

Train No. 68 was coming around the curve from East Los Angeles when a well-dressed woman was noticed to sten her way to the middle of the track.

Just at this moment another train bound for Boyle Heights pulled out, and she stopped to let it pass. She seemed to be unconscious of the fact that an-other train was coming around the

curve on the very track she stood on.
Officer Hill, who has charge of this crossing, warned her by calling to her to get out of the way, but she paid no attention to him. The officer's cries attracted Gripman J. J. Mooney's attention and he, too, called to her to get out of the way, and at the same time he did all in his power to bring the train to a standstill.

to a standstill.

The poor woman did not seem to know that she was in any danger until a second before the dummy struck her, when she looked around with horror painted on her face, and gave one yell as she was dragged under the dummy. The streets were crowded with men, women and children at the time, and as women and children at the time, and as the poor woman disappeared under the dummy women ran screaming from the scene and men turned pale. The train was brought to a standstill almost im-mediately after the woman was struck, and as soon as possible twenty or thirty men crowded around and fairly lifted it from the track.

men crowded around and fairly lifted it from the track.

The injured woman, who was still conscious, was carefully picked up and carried to the drug store opposite, and Drs. Cowles, Colburn, Davidson and Cochran were soon in attendance.

under the circumstances.

The gripman was taken to the police station, where he was kept until the police had investigated the case, but as no blame could be attached to him he was allowed to go. At the time of the occurrence Officers Hill, Rich and Dugan were near by and gave ample warning, but it seems that Mrs. Trenholm is deaf, and of course as she could not hear the gong or the shouts of the men she did not know that she was in danger until it was too late.

This is one of the most dangerous

danger until it was too late.

This is one of the most dangerous crossings in the city, and it is a wonder that there are not more accidents. The curve is such that the trains have to go at the full speed of the cable to keep from cutting the rope, and until a different arrangement is made there will be more or less danger. Notwithstanding the fact that the cable company keeps a man constantly on duty at this corner, and a policeman stationed there from 8 until 5 o'clock, it is almost impossible to keep people from getting in the way until 5 o'clock, it is almost impossible to keep people from getting in the way of the cars, and there have been quite a number of very narrow escapes; in fact, only a few weeks ago the big policeman who stands on the crossing was struck by a train, knocked down and quite badly cut up about the head.

Immediately after the accident Superintendent Alken sent Dr. Brainerd, the cable commands.

Are still offering great inducements to settlers on the Alessandro tract OF 21,000 ACRES! Which lies only eight and one-half miles from Redlands on the east and the same distance from Riverside on the west. Ten thousand acres are already sold; 5000 acres are being improved. Between 300 and 400 families are living there today, with churchs, schools, stores and hotels. The Alessandro Tract of 21,000 acres is equal to 35 square miles, and is 12 miles long by 3 to 4 miles in width. A most magnificent valley. With the finest soll in the world for orange or fruit culture; with the best water right in Southern California. No stone or brush on the land. People wonder at the great success and rapid growth of Alessandro until they are driven over the tract, then they are not surprised, and all exclaim: "The half has not been told."

Nature has truly been lavish with her gifts at Alessandro in regard to climate and location, and we predict a much more rapid growth during the next two years than in the past year and a half of its existence.

Smith, who is rather a good-looking little fellow, used to be a clerk in the old St. Charles Hotel on North Main street, but he has been out of employment for some time past, and has devoted himself to insulting girls and women on the streets, who were not fortunate enough to have male escorts with them.

fortunate enough to have male escorts with them.

Last Saturday night Mr. Smith thought that he could strike up a firtation with William Mann's three daughters, who happened to be down town shopping. The fellow followed them around several blocks, and when they started for their home on Banning street and reached Alameda he stepped up to them and asked to be allowed to escort them home. Fortunately Mr. escort them home. Fortunately Mr. Mann was only a few steps ahead of his daughters, and when he heard them order the fellow to leave he returned and was proceeding to give Smith a sound thrashing when Officer Marden came up and placed Smith under arrest. Some of the San Francisco papers are already admitting that Glenalvin's giant aluggers are liable to bat out a victory at almost any stage of a game, although it is claimed that they are slow on the base lines. Two or three of them may be a little slow, but there is no discount on the speed of Glenalvin, Tredway, Rogers, Hasamaear and Stafford, while Hulen is also a good runner and Glenalvin may be depended upon to get the little fellow around with the rest of them.

### A THUG CAPTURED.

An Important Arrest by Police **Detectives** 

A Supposed Sand-bagger Locked Up at the City Prison.

Believed to Have Committed Several Highway Robberies.

r. J. Gallagher the Name of the Ma Fully Identified by His Last Vic-tim and Several Other

Within the past few weeks several cople who have business in dark and out-of-the-way street's late at night have been knocked down and robbed. In almost every case the thieves have escaped, but the police detectives made a capture yesterday morning that will probably put a stop to this kind of bus-iness.

Detectives Bowler, Benson and Auble arrested a man named T. J. Gallagher and lodged him in the city prison on charge of robbery, and as the boys have worked up a strong case against him he will probably go to State's prison for a long term of years.

Day before yesterday Erick Lif of San Bernardino county came to this city for the purpose of proving up on a piece of land. He was late in winding up his business, and found it necessary

up his business, and found it necessary to remain in the city over night.

Late in the evening he became restless, and started out for a walk. After strolling around awhile he found himself walking down Alameda street, and when he reached a point near Rose street he noticed a man with a heavy black heard coming hurriedly toward. black beard coming hurriedly toward him. As soon as the man got within a few feet of him he struck him on the head with a heavy instrument, and Lif knew nothing more for some time.

When he came to his senses he found that he had been robbed of \$50 in cash

and his jewelry.

The matter was reported to the police early yesterday morning and the detectives started out at once. The description given them fitted Gallagher exactly and that individual was taken in, but he gave a straight story and was released. Later in the day the officers found a couple of men who said they witnessed the robbery and that they could identify the thief. They also described Gallagher and the officers looked him up again. He was found with a woman on

jolly time.

Gallagher was arrested and taken to the police station, where he was con-fronted with Lif and the two men who witnessed the robbery. Both the men and Lif were confident that Gallagher

is the robber and he was locked up.
In the afternoon he was taken before
Justice Owens and arraigned. His bail
was fixed at \$3000 and his preliminary
examination was set for 10 o'clock this

orning. He is a hard case and the detectives believe that he is the man who has been "standing up" people of late.

### LODGED IN JAIL

The Runaway Girls Returned from Long Beach. Eliza Rice and Annie Ellis, the two welve-year-old girls who left for Long Beach a few nights ago, and who were arrested in Long Beach night before last, were brought back to this city yes-terday by Humane Officer Wright and lodged in the County Jail.

The girls made their appearance in Long Beach Tuesday evening and broke into a vacant house that is owned by a lady who had the Rice girl with her during last summer.

The youngsters at once made them-elves at home and started in as firstselves at home and started in as first-class housekeepers. In less than an hour the house was surrounded by boys ranging in age from 12 to 17 years. The house is not close to any other houses, but the young vagabonds kicked up so much noise that the neighbors were soon made aware that something

out of the ordinary run of things was going on in their midst and a committee of investigation was soon in the field. The City Marshal was called in and the girls were placed under arrest on a charge of disturbing the peace. The mothers of the boys took their respective sons home and proceeded to thrash them within an inch of their lives.

The girls will be taken before Judge Smith this morning and will be sent to Young Peachy and Young Turner, the Whittier.

boys who were supposed to have gone with the girls, deny that they ever had anything to do with them, but they admit that the girls asked them to go to Long Beach with them.

A Question of Jurors' Fees. The other day Justice Owens refused to secure a jury in the case of Davis vs. Williams for wages until the plaintiff had put up jury costs, as juries in civil cases have been knocked out of their fees in more than one case in his court of late. The attorney for the plaintiff, W. T. Williams, who demanded a jury, became very angry and yesterday Justice Owens was cited to appear be-fore Judge Van Dyke of the Superior Court next Monday to show cause why he should not grant the plaintiff a jury

Justice Owens proposes to test the case and he will show that jury fees should always be put in the court's hands before a jury is summoned.

### RAILROAD AFFAIRS.

Passenger Rates to the East are Being Cut.

from the Fact. A Word More About the San Pedro

Wharf Scheme.

Jay Gould's Party at El Paso-The Port Harford Road-Summer Excursion Business-Local Notes.

On the 28th of this month the trus. tees of the town of San Pedro will consider the petition of Messrs. Carnicle and Hine for a wharf franchise at Timms' Point and the privilege of making a railroad tunnel to extend from their lately-acquired water front to a cañon about half a mile distant. The current issue of the San Pedro Times contains the formal public notice of the intention to apply for these rights, as required by law. The particulars regarding the acquisition of Timms' Point and the purposes of the promoters of a prospective big enterprise have been fully described in this paper. The known facts were stated positively, while the conjectures were printed as such. The callow reporter of the other morning paper, caught napping as usual, resorts to his stereotyped form of 'official denial' to divert attention from the fact that he was scooped on from the fact that he was scooped on an important piece of news, and stupidly tumbles into his own pitfall. It will be borne in mind that The Times did not say that the Santa Fé had purchased land at San Pedro, but did say that Messrs. Carnicle and Hine, whoever they are, had bargained for Timms' Point and made a payment on it. The names of their backers in this scheme were not stated, though it was inferred that the Santa Fé was behind it, either directly or indirectly, that road being the only one to which new terminal facilities at San Pedro would be desirable; and to the Santa Fé such terminal facilities at San Pedro would be desirable; and to the Santa Fé such an acquisition will become an urgent need, though an official acknowledgement of this may be difficult to obtain. The assertion that "there is absolutely no basis for the story" could be easily proven erroneous by reference to the legal advertisements in the San Pedronery named where the notices.

the legal advertisements in the San Pedro paper named, where the notices above alluded to appear. That alone is sufficient basis for everything that Thus TIMES stated positively, though the further facts of the purchase of the Point and the amount of money paid and promised are known beyond a doubt by several people who are not directly interested. No one should be doubt by several people who are not directly interested. No one should be surprised at an official denial from the railroad company, for if the Santa Fé people were the actual movers in this matter an official confirmation of the story probably could not be obtained until the regular trains were scheduled to run to and from Timms' Point. It will be rememdered that The Times was the first to announce positively that the will be rememdered that The Times was the first to announce positively that the Santa Fé had negotiated for the Santa Monica Wharf and Terminal Company's franchise and property. The rare humorist on the other morning paper at that time grew facetious, trotted out an 'official denial' and then, when the deeds transferring the property were filed for record a few weeks later, had the effrontery to announce the fact in the effrontery to announce the fact in big headlines and claim it as "exclu-

### CUTTING PASSENGER BATES.

Passenger rates, eastbound from Los Angeles, are in imminent danger of be-coming demoralized. Tickets to various coming demoralized. Tickets to various Eastern points are being sold at from \$8 to \$8 below tariff. Though the cutting applies to nearly all common points, it is especially pronounced on the rates to Creede, the new Colorado silver mine town, as there is considerable travel to that promising El Dorado. The scalpers seem to be doing most of the business, and make rates to suit themselves, the regular offices sticking close to tariff on business over the counter. Tickets to Creede are being cut \$8. \$8 and even \$8. while rates to cut \$3, \$5 and even \$8, while rates to Cincinnati, Pittsburgh, Philadelphia and all the Atlantic cities are shaded more or less. A peculiarity of the present condition of affairs is that in some cases the cuts from tariff rates amount to more than the commissions which are paid for the sale of tickets. As the dividing of the commission is supposed to be the only chance of a scalper's shading the regular rate, it looks as though some of the roads are standing in and permitting extra reduc-tions to secure the business.

### "KORESH" IN CHICAGO.

The Schemer Talks About His California Experience.

A \$200,000 Heiress Among His Converts-The "Messiah" to Absorb Everything in Sight-Future of His Faith and Followers

Some days ago Dr. Cyrus W. Teed, better known as "Koresh," stopped over in this city on his way East and delivered one or two lectures, after which he proceeded on his journey. He has just arrived in Chicago and his California experience is given in the following special dispatch from that city to the San Francisco Examiner of

city to the San Francisco Examiner of Wednesday:

"Koresh," Cyrus W. Teed, has just returned from a trip to California and brought with him a \$200,000 heiress, but he refuses to give her name or talk about her. Dr. Teed was closely questioned on this point, but he steadfastly declined to satisfy public curiosity in the matter.

"We have about 200 followers in the West," Dr. Teed said. "These people come from all classes and denominations, but psincipally from the Swedenborgians. We have established a home at San Francisco, where our people can gather."

"Did you visit Thomas Lake Harris, the 'Primate' of Santa Rosa, Cal., who has achieved a good deal of notoriety lately?"

"Yes, and was very well received. He indorsed my doctrine, but we have not yet entered into any confederation with him. Our plan is to form a confederation of all of these societies—namely, the Economites of Pennsylvania, the Ammonities Shakers and Perry's People. The College of Life here will be the headquarters of this confederation."

"Will any more people from the Pacific Coast come to Chicago?"

here will be the headquarters of this confederation."

"Will any more people from the Pacific Coast come to Chicago?"

"Yes, in about thirty days a delegation of at least fifty will arrive at the College of Life. Most of these will stay at the college, but a few will enter the avenues of trade until we can provide them with work. We have now a machine shop and a printing establishment on Cottage Grove avenue, near Thirty-third street, which will furnish employment to many of them. Most of these people are in good chreumstances financially, and some are even what you may call rich. In about a year we propose to buy a large farm near Chicago where we can colonize those who wish to follow agricultural pursuits. We also have some inventions that will give many employment. One important one is the rotary engine. We have the inventor with us and propose to manufacture our engines in this city." to manufacture our engines in this city."

"What do you think will be the result of this confederation?"

"Ultimately it will convert the world to our faith. At present it only affords a greater strength for people of our faith."

The Rev, S. S. Martin, an ex-Baptist minister from; Washington State, was at the College of Life this morning, and to a reporter be said: "I arrived in Chicago from the West two weeks ago. I was a Baptist minister, but about three weeks ago I learned of Dr. Teed, and commenced to study his doctrine, and am now a firm believer in it, and will soon start out on a lecturing tour. A PICNIC IN A CANTON While the snow is yet falling in the East the season of picnics is at hand in this land of the afternoon. Yesterday Judge and Mrs. S. C. Hubbell enter-tained a party of twenty ladies and gentlemen at a picnic in Millard's Cañon, the affair being given complimentary to Mrs. and Miss McLellan, who leave for their home in Seattle next Monday. This Lenten picnic was the crowning feature of the round of entertainments which these fortunate guests have en joyed during their sojourn in Los Ange-les, and the pleasure of a day spent in this picturesque caffion among the ferns and wild flowers and mountain brooks and boulders will deepen and intensify the memory of the many social gather ings given in their honor.

The party left the city at 8:80 a.m.

The party left the city at 8:80 a.m. in carriages, driving out by way of Pasadena and on through the poppy fields, ascending the uplands beyond, to the mouth of the caffon. When the carriages had proceeded over the rugged road as far as practicable the party alighted and followed the narrow path, which finally opened out into a perfect little woodland bower about 200 feet square. Here the carriage seats and robes were brought and lunch was served in a dining-room, its ceiling of blue sky frescoed with interlacing boughs, its walls hung with woodland mosses and its floor carpeted with ferns and bracken. A mountain stream rippled down at one side and a camp-fire was built not far away, where delicious coffee was made. The service and the menu were as complete and elaborate as though given in the dining-room of the hostess, who was assisted in supplying the wants of her guests by Mmes. R. M. Widney and I. N. Van Nuys.

As the old scheme was so successfully carried out, and as the contract and lease will soon expire, does it not seem and look like the present proposed scheme is designed to terminate with the same results as before, since the city cannot legally sell, lease or otherwise dispose of the waters of the river for more than six months? Is it not clear that the only way for schemers to acquire control of the waters of the river and then by lease and contract turn both headworks and water over to the schemers for an indefinite period of time, and in that way the schemers will become masters of the situation and the city lose all control. It certainly, has the ear-marks of a deep-lafd scheme to have the city again put up another water works to be turned over to

It certainly has the ear-marks of a deep-laid scheme to have the city again put up the money to construct works for private parties, the city to draw a blank, as before the scheme of 1864.

STEINITZ THE CHAMPION.

Conclusion of the Chess Match in Favor of the American Bohemian.

[New Orleans Times-Democrat.]

The grand contest for the chess match championship of the world between the rival Bohemian and Russian masters came to a close with the twenty-third partie played on the 28th ultimo, and the former once again maintains his title to the honor in the most closely contested match, duration considered, in his history as a chess player.

He rapidly developed, his pieces, and soon Steinitz's game was hemmed in. On the twenty-eighth move Tchigorin's win was a foregone conclusion. Reserving fuller comments on the great struggle for a later period, when we shall have had all the parties before us and when our space better permits than at the moment, we merely observe that after so protracted a match, in so enervating a climate, between players whose habits are each far to the northward it is small wonder, that blunders ward, it is small wonder that blunder ward, it is small wonder that blunders should mark the closing play; indeed, the wonder is that they are so few as they seem to have been. Tchigorin, both as the younger man and as coming from the almost frigid latitude of St. Petersburg, perhaps suffered more in this respect, but Steinitz, too, must have been much affected. Indeed, on the occasion of the final same bein described. casion of the final game he is described as having 'lost his coolness, and pacing up and down the room while it was his

### SCHWATKA IN ALASKA

FIRST LETTER FROM THE EX-PLORING EXPEDITION.

as In and Around Juneau Up the Yukon River With Native Guldes-Greeted With Hospitality-Crushing Through Ice Cakes.

[No. I.—International Press Association.]
TAHKOU RIVER, May 201891.—On May
7, 1891, the Pacific Coast Steamship
company's vessel, "City of Topeka,"
crossed Dixon Entrance and entered
Alaskan waters, leaving behind those
of British Columbia.
All of these waters, for a stretch of
over a thousand miles along the Pacific
coast are but deep inlets and channels,
huge salt water rivers, so to speak, that,
cutting in every direction, make a vast
network of islands picturesque in the
extreme and not even yet wholly explored. The most freely navigable of
these many channels running parallel
with the coast, is called "the inland
passage to Alaska," and is yearly becoming more popular with summer
tourists seeking rest and recreation
here. One of the peculiar features of

this southwestern section of Alaska,

this southwestern section of Alasks, and one that can only be appreciated by the explorer or hardy frontiersman, is the ease and pleasure with which one can travel the coast waters, only to plunge into the roughest of "roughing it," as soon as these are left, and the Alpine interior essayed.

On board the "Topeka" was the New York Ledger Alaskan expedition that had this prospect ahead of it, the subsoriber being in command. One of our main objects was to cover as much unexplored country as possible, in any direction, yet a general plan had been formed to follow my old explorations of 1883 to, or near, the Pelly and Yukon river confluence, and there begin the work into the unknown interior westward and southwestward.

We had occasion to change this plan

work into the unknown interior westward and southwestward.

We had occasion to change this plan so as to cover more unexplored country than usual. It came about by discussing a new and unexplored route from Juneau with citizens of that lively metropolis of our distant colony, 'the largest city in the largest territory in the largest republic in the world," as they used to patriotically put it. It was to go over what was called the Tahku trail that led to a large lake in the interior, and by its draining river, gain the Yukon, where I joined my old trail of 1883, and could then carry out the program as previously planned. It was believed an available commercial trail might be opened this way, that, with Juneau as a basis, could be made to supply the Yukon valley even to Behring sea, better than by any known route, while it would be no small feather in the cap of the New York Ledger expedition, to be able to do this preliminary pioneering. This belief was founded on information obtained from the interior Indians when bringing out their furs, and from prospectors who had searched this general line for precious minerals. It might be, also, that the present Yukon traffic would not pay, while the future might, and it was well to be Yukon traffic would not pay, while the future might, and it was well to be prepared with the information. The many other reasons for or against this trail can be made clearer as we travel over it later. When we arrived in Juneau a corresponding interest was soon worked up by those on the steamer, the citizens pledging everything they could to make the

worked up by those on the steamer, the citizens pledging everything they could to make the enterprise a success, and so we disembarked here.

The first point we touched in Alaska was Tongass. After Tongass, we meet nothing but salmon cancries for a few days, reaching Junesu on the 9th of May, where our freight is d' barked and we continue on, for th we continue on, for the opolisis of enough importance to be touched by the returning steamer, thus making a short round trip.

We wake up next day in Glacier Bay,

short round trip.

We wake up next day in Glacier Bay, on the first vessell of the season to essay it, as it is only visited in the interest of the summer tourists.

At Sitha we were crowded with passengers of the spring court term at Juneau. There were ten prisoners, only six of them being murderers, mostly confined to half-breeds and Indians. The naturally resulting conversation disclosed a statement that there had never been a simon-pure lynching, nor a legal execution, in Alaska. At Wrangell, in early days, a murderous gambler was made chairman of a vigilance committee, the chair was pulled out from under him and he broke this peaceful record—also his neck; but any one familiar with frontier justice knows there is a wide chasm existing between this and lynching. In a somewhat similar action, an Indian murderer performed traction on a rope, to the astisfaction of the vigilance faction and the greater dissatisfaction of the lesser faction. Killiance is very agreeable to the eye but somewhat abominable to the nose, due to a flourishing herring fishery and attendent guano factory. The United States Marshal attempted to arrest a native here for trying to drown a squaw guilty of witchcraft. I have never yet seen anything bewitching about an Alaskan Indian woman, but I guppose tastes vary. This Alas-

have never yet seen anything bewitching about an Alaskan Indian woman, but I suppose tastes vary. This Alaskan, Cotton Mather had some inkling of the proceedings, so he secreted himself in the Alaskan woods, where the proverbial needle in a haystack would be as conspicuous as a circus poster by comparison. There were not eleven prisoners from Killismoo to Juneau.

Juneau reached, preparations were begun at once, the first obstacle being the report that the Tahku river was not yet open. A big cance, a two-ton or three-ton affair, was easy chough to get but packers themselves over the land trall were hard to obtain until a sort of sub-chief of the Tahkus, Yashanah hard and policemen.

and recruits were slowly obtained. Even then I could only obtain half enough, at good stiff rates of course, and had to double packs (averaging 100 pounds each) over the trail of nearly 100 miles as it proved.

The 25th of May we got away, seven Indians and three white men, six of the natives being packers and one, Robert, the owner of the boat. On the recommendation of some citizens who believed in the horror of the average Indian for all legal papers I had a huge contract drawn up, resplendent with many colored seals and ribbons, and this they signed by touch of pen, while the United States District court interpreter read aloud its contents with a solemnity equal to that given a deathwarrant. I still retain that page of legal indicrousness, and while admitting it may have done me much good, yet I can only compare it with the vertict of the frontier coroner's jury wherein, sitting on a man's body dragged from the river's bed and riddled with bullets, they concluded that the deceased had come to his death from drowning, caused by water pouring in through the bullet-holes.

So about noon of the 25th, with the American flag hanging from the peak, we got away in the beginning of a wind and drizzling rainstorm that later made our first day's trip one of the n st unpleasant of the whole journey. I enthusiastic crowd of citizens lined the shore near the steamer's dock, and as we paddled away down the channel gave us many a hearty cheer and many warm wishes for our success.

Let us now take a hasty look at the little expedition as it started, the Indians being sufficiently described to pass them over till events call them up in detail. The commanding officer was the heaviest one of the party and made excellent ballast in the rear part of the cance.

The scientist of the expedition was Dr. C. Willard Hayes, representing also

the heaviest one of the party and made excellent ballast in the rear part of the canne.

The scientist of the expedition was Dr. C. Willard Hayes, representing also the U. S. Geological survey, through the courtesy of Major J. W. Powell, the head of that government bureau. To Dr. Hayes also fell the photographic work in the main, as well as the topographic or map-making. I had hoped to get a professional photographer, and felt sure of success when Mr. Lander, kin, one from Juneau, made a. application for the place. He was caught on the grand jury, having already been sworn in, but we both thought that a mere bagatelle as an obstacle, but the Judge and District Attorney thought otherwise. Both were willing enough, but there was nothing in the law (the Oregon code prevails here, by act of Congress "so far as it is practicable") that would allow it. The only excuse whatsoever was one of severe sickness, attested under oath by a physician.

"But suppose a grand juror dies?" I

vere sickness, attested under oath by a physician.

"But suppose a grand juror dies?" I asked the Judge.

"I could not excuse him from duty on that ground." he replied, slowly, shaking his head. So Mr. Landerkin remained and Dr. Hayes did double duty. Mark C. Russell was the only other white man in the party as we started, which I organized on the basis of all my previous expeditions, or just as few white men as possible, with natives to do about all the work of transportation, guiding, hunting, etc., etc., with which they are so familiart in heir own country.

they are so familiart in heir own country.

The Indians were very hilarious, evidently stimulated by the enthusiastic departure given us, and they showed their appreciation by "spurting" ferociously every little while instead of settling down to steady work.

We stopped about 2 o'clock in the afternoon in a pretty little sheltered cove for lunch, and really enjoyed our selves for an half hour, protected from the beating rain. Robert impressed me with the fact that the tide was then out, and asked me to note that when the beating rain. Robert impressed me with the fact that the tide was then out, and asked me to note that when it was in, not a landing place was to be found anywhere along the shore for probably stretches of many miles. In a bright green prairie of a few acres in this ceaseless timber tract, and bordering the shore was picturesquely perched a Tahku town of ten houses, Ahk-kwan by name. It is not often a graveyard is the most cheerful part of a place, but here the only enlivening thing in a view of dismal green, rendered doubly doleful by the rain, was a bright red flag that fluttered from a high staff at the corner of a grave. I was told it indicated that that particular native had just recently died.

About 4 o'clock we swung around into the Tahku inlet, and our change of course, now allowed us to set salls. Along we bowled, wing and wing, the ice-cakes we had met at the mouth of

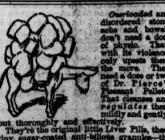

the inlet growing larger as we ascended it towards the glacier, until they could well be dignified with the name of icewell be dignified with the name of loebergs; certainly so. In comparison with those from the Muir glacier that are "thus styled. The Tahku glacier ice is the bluest I have ever seen either in or out of the Arctic or Alpine regions. It was really a deep bluish-black in many places though clear as crystal.

It was quite dark when we got to the mouth of the Tahku river, at a half-completed salmon fishery, the white men sleeping in it and the Indians in the smoke-house, all of us stiff as pokers.

### FOSTER'S FORECASTS.

The Next Storm Wave Due on the Pa eific Coast March 22.

It Will be Dangerous on the Atlantic Coast

—Let the Mariners and Fishermen

"Take a Day Off" About the 27th Inst.

[corraight, 182, BY W. T. FOSTER.]
St. Joseph (Mo.,) March 18.—My last
letter gave forecasts of the storm wave
due to cross the continent from the 16th
to the 23d and the cool wave from the 19th to the 28d. The next storm wave will be due to reach the Pacific Coast about the 22d, cross the Western mountains by the close of the 28d, the great central valleys from the 24th to the 26th and the Eastern States on the 27th or 28th.

27th or 28th.

This storm will be very dangerous on the coast of the Northeastern States on the 37th or 28th, and if it should not reach the coast till late on the 28th the highest tides that have been known for years may be expected. The tides will be very high on all our coasts on the 28th, but if this severe storm shall have passed out onto the Atlantic on that

28th, but if this severe storm shall have passed out onto the Atlantic on that day the northeast winds will materially lessen the tides on the coast of Maine and Newfoundland. Keep off the oceans and lakes about that time.

The fishermen about Newfoundland would better take a day or two off about that time and remain away from the waters, and along the coasts of the Bay of Fundy preparations should be made for destructive tides and storms on the 27th and 28th.

That dangerous storm wave will probably continue on the routes of the passenger steamers between New York and Europe from the 28th to April 2, and those who do not desire a rough passage should select some other time. At the same time, not far from the 28th, a dangerous storm will be developing on the Pacific slope. The Pacific Coast storms are not usually severe and this one will not be of such great force as will that on the Atlantic coast.

There are two other storm waves moving around the earth in these latitudes, one of which will probably be not far from the British Isles and the other in Central Asia.

Electro-planetary meteorology indicates unusual disturbances all around

The last storm wave of March will reach the Pacific Coast about the 28th, cross the Western mountains by the close of the 29th, the great central valleys from the 80th to April 1 and the Eastern States on April 2 or 8. This storm will be at its greatest force about the 28th and will decrease in energy as it moves eastward.

the 28th and will decrease in energy as it moves eastward.

Cool waves will cross the Western mountains about the 25th and 31st, the great central valleys about the 27th and April 2, and the Eastern States about the 29th and April 4. A blizzard is expected on the Northern lakes on the 37th or 28th. This storm will also affect the weather of the Southern States, with a probability of tornadoes. The disturbing influences have been so great this year that the storms from the tropics have moved up onto the continent, and as I am not yet able to calculate these tropical storms they have,

tinent, and as I am not yet able to cal-culate these tropical storms they have, in two or three cases, knocked my fore-casts out. I hope that my readers will be charitable, however, for I am deter-mined to conquer those tropical storms, or their records, so as to be able to fore-cast them also.

MISTAKES OF ORTHODOX SCIENTISTS.

Among recent astronomers Prof. R.

A. Proctor was, in the United States, the most widely-known critic. He spent his life in discussing and criticising the theories and discoveries of others and in advancing his own peculiar theories. He was a forcible writer, and most of his work has been well received, while a part of it has been severely criticised. One of his hobbies was that the heat and light of the sun is kept up by meteors falling into it, but this has generally been discredited. It would have no foundation left if the electric theory should be accepted, and therefore his friends are doing all they can to check the growing belief that electricity is the cause of heat and motion. MISTAKES OF ORTHODOX SCIENTISTS.

tion.

In his discussion of other worlds than ours Prof. Proctor dwells long on the inhabitants of Mercury, basing his arguments on the supposition that Mercury revolved on its axis in about twenty-four hours, making the days and nights of that orb about equal to those of the earth. But recently it has been discovered that Mercury revolves only once in about eighty-eight of our days. Therefore its days of sunshine would equal about forty-four of ours and its Therefore its days of sunshine would equal about forty-four of ours and its nights would be of equal length. This would cause sufficient heat to boil water and would so change the conditions of the weather on Mercury as to make it impossible for animal life to exist. Therefore Prof. Proctor's long argument on that subject is left without a foundation and this failure suggests that he may have been mistaken also in his opposition to electro-planetary meteorology.

When Proctor criticised the the ory that the planets influence our weather he did so without any knowl-edge of what the theory is. He ap-peared to entertain the common Eneage of what the theory is. He appeared to entertain the common English idea that no valuable scientific discovery could be made by the Western people who inhabit the Mississippi Valley, and therefore he never informed himself on this subject. But he made a mistake, either in opposing the theory or in admitting its basic principles, and this I propose to prove by quotations from his writings.

Electro-planetary meteorologists hold that electricity and magnetism are the same, but under different conditions; that these elements affect the earth, its atmosphere and its weather through one process, while gravity affects them through another, and that gravity is an effect of electricity and magnetism. In effect, Prof. Proctor has admitted these facts, which I will proceed to prove.

Weather changes will probably occur at and within 100 miles of Los Angeles

within twenty-four hours before or after sunset of the dates given below:
March 20—Moderating.
March 21—Warmer, threatening.
March 22—Storm wave on Los Angeles

March 25.—Storm wave on Los Angeles meridian.

March 25.—Wind changing to west.

March 25.—Fair.

March 26.—Moderating.

Since January 80 three tropical stofms have moved up onto the continent, totally changing the usual weather. These storms are unusual and always cause my forecasts to fail.

They cannot be forseen till a record of them is made by South and Central America and Mexico.

THE MISSOURI GERRYMANDER.

eratic Legislature's Fishh Line District. [Kansas City Star (Ind.)] A map of the State of Missouri showing the gerrymandered Cougressional districts presents so many artistic features that it is difficult "where to choose," but as presenting a fair illustration of what a stupidly partisan Legislature can do under the direction of a party central committee in the way of

The Sixth District

map is herewith presented of the new Sixth District in all its gerrymandered

Sixth District in all its gerrymandered elegance of proportion.

Every honest, every fair man, knows as soon as he looks at this fishhook and line of a district sprawling overthe map, meandering through the State and crossing the Missouri River in its windings, shapeless and inconvenient, that it is meant to swindle and rob and cheat somebody. Any man may know that the people who live in the district as now constituted never asked for anything like it; and that if the question was left to them whether they would have such a district they would vote "no" by an overwhelming majority and have such a district they would vote "no" by an overwhelming majority and without regard to party. The formation of such a district is the work of one-horse and bat-eyed politicians and their dupes, who think they know more than the people, and, in their efforts to do something politically smart entirely transcend their authority.

There are other districts which might be cited as illustrations, but this Sixth will do, and again the Missouri voter who does not profess to be a statesman or a politician, but just an ordinary honest and decent man, is invited to look at it and interview his own conscience on the subject of gerrymandering.

own conscience on the subject of gerry-mandering.

There is no excuse in honor or con-science in this gerrymander. No man will pretend to justify it on any moral ground. There is no reason given for it except that it is done to deprive citi-zens of Missouri of their rightful and proportionate share in the Government. The excuse is as ignoble as the work. In one district it is to swindle the Re-publicans: in another to cheat the third In one district it is to swindle the Republicans; in another to cheat the third party, and one district was shaped up, according to the unblushing confession of the designer, in defiance of the wishes of the people of the two counties, to counteract the influence of a newspaper considered non-partisan. Compared with such actions the deeds of a housebreaker seem respectable.

And what even from the party standpoint is to be permanently gained by this disgraceful gerrymander? Nothing. Such deeds return to plague the in-

this disgraceful gerrymander? Nothing. Such deeds return to plague the inventor. In Ohio a gerrymandered district was fixed up to beat McKinley; and in a general election, in which the Democratic party was triumphant everywhere, McKinley was barely beaten by a scratch, and in the next turn of the political wheel he was elected Governor of Ohio.

The more than 200,000 voters, whom by this dirty trick it is proposed to

The more than 200,000 veters, whom by this dirty trick it is proposed to scatter and break up and rob of their share of representation, are yet Missourians; citizens and the equals of their Democratic fellow-citizens; they are amount interested in the welfare and progress of the State as are the Democrats of the State; in nine bills out of ten introduced in Congress their interest is the same. No good purpose is served by this virtual disfranchisement. It is no justification to say that the Republicans have done the like, or if in power would do it again. Under that plea any crime may be justified.

### PERCOLATED WATER.

An Important Water Right Question Set tied in a Colorado Court.

[Special correspondence Irrigation Age.]
The case of William McClellan vs.
Hurdle & Wilson was decided last month
in the District Court at Greeley, the
jury returning a verdict for defendants. jury returning a verdict for defendants. The question at issue was one of vital importance to the agricultural interests of our State, and was watched with keen interest by this community. The case in brief is as follows:

Defendants farm 160 acres on

Defendants farm 160 acres on Lone Tree Creek, seven miles northeast of Greeley, and since 1889 have irrigated the same by means of pumps, tak-ing water from a well dug on their own land at a distance of 150 feet from said creek. Plaintiff is farming on land one mile below defendants' well, and uses water from Lone Tree Creek by means of a private ditch built in 1886 for irriga-

from Lone Tree Creek by means of a private ditch built in 1886 for irrigation purposes, and claimed that when the pumps were in operation the flow in the creek was lessened to such an extent as to work him an injury, and last spring he brought action against defendants to enjoin them from further operation of said pumps. The case occupied the attention of the court for two days and a large number of experienced irrigators were on the stand.

Judge Downer's instructions to the jury were in substance as follows: That water percotating beneath the soil (in no well-defined channel) belongs to the owner of the soil, and he is privileged to use the same as he deems best. This is probably the first time in Colorado that this question has come up for judicial determination, and the verdict, being favorable to defendants, is of special interest and importance in view of recent improvements on irrigation pumps, and no doubt will be a great incentive to the further development of lands favorably situated as to a supply of underground waters, and that are incapable of irrigation from other sources.

An Old Couple's Troubles.
e San Francisco Chronicle of

The San Francisco Chronicle of Wednesday says:

David A. Mell, the old gentleman of 70 years who is accused of infidelity by his aged wife, Sarah A. Mell, has retaliated and denies that he has broken his marriage vows. The old fellow says in his answer, filed yesterday, that he is not able to support his wife, and is a victim of many diseases. In a cross-complaint he asks for a divorce on the ground that his wife deserted him twelve years ago. Mell lives in Los Angeles county, and his wife is living with her daughter in Oakland.

with new maps and original American articles by eminent writers. Vol. XX. (Chicago: R. Peale & Co.\*)
The subscribers to this great encyclopedia, which holds the front rank of all
works of its kind, will welcome the an-

works of its kind, will welcome the ap-pearance of the twentieth volume, with its rich store of information. Comparison with the earlier editions will show how much has been added to the already priceless mine of information which the former editions contained, and it will be a matter of surprise that so much

be a matter of surprise that so much could be added and yet the work be offered to the public at about half of its former price. If a person could have but three works, the Bible, Shakespeare and the Encyclopedia Britannica, he might yet be well read and thoroughly intelligent.

CONGRESSMAN SWANSON. By C. C. Post. (Chicago: Charles H. Sergel & Co.\*)

This little volume is illustrative of the great questions of the day, and its object is to throw light upon the problems which are presented to modern civilization for solution. Among the things treated upon are the tramp nuisance: the difference between labor and capital, and the manipulation of political wires, by the "fine Italian hand of the skilled politician." It contains much food for thought, as well as a pleasant seasoning of romance.

Magazines.

Current Literature (New York) for March is up to its usual high standard. The selections give us a taste of some of the best thought of the day. Under the general departmental head of "Cur-

of the best thought of the day. Under the general departmental head of "Current Facts and Opinions" some interesting papers are presented on "Marriage and Divorce," "Telegraphy Without Wires," "Peace of Europe," "Revolution and Russia," etc.

Under other heads may be found: "Corot, the Generous," "Drama of the Heavens," "Smoking Scientifically Considered," "Where People Live the Longest," "The Telegraph and Telephone," "Is Religion Dead?" "What is it that Gets Drunk," "The American Snob," "Gossip of Anthors and Books" and numerous other articles, with a choice selection of poetry. The Review of Reviews (New York and London) for the current month is a noteworthy number, and in taking it up the busy person is most gratefully conscious that it is a magazine which will enable him, even with his abbreviated leisure, to keep abreast of the times if he can but carefully read its pages.

Among the papers which will be read with interest are the character eketches by W. T. Stead of Mr. Spurgeon, Cardinal Manning and Sir Morell Mackenzie. "The Progress of the World" is a department which affords the resider a glimpse of all the changes of importance which are transpiring in the civil, political, social and religious world. Its reviews of books and periodicals are concise and discriminating, and the glance afforded of the "Leading Articles of the Month," which have appeared in the world of literature, is a refreshing one.

HOUSE PAINTING,

Prophet Potts as a Piunger,
Los Angeles, March 16.—[To the Editor of The Times.] A paragraph in your
paper this morning calls attention to the
fact that Senator Stanford's nomination by paper this morning calls attention to the fact that Senator Stanford's nomination by the third party for President would not be inconsistent, inasmuch as the Senator belongs to the debtor class, stating that he and his partners are \$60,000,000 or \$70,.000,000 in debt. On the same basis you could hardly go amiss for a nominee for the third party, as everybody doing any business is in debt, many of them more in debt in proportion to their business and the assets than is Stanford. The Government of the United States is in debt for more than all the money of all kinds in this country. England and France are in debt more than all the money in the world. The 8050 banks of the United States are in debt to the people about \$4,000,000,000, and the people are in debt to the banks about \$4,000,000,000, and the people are in debt to each other about \$4,000,000,000, and the people are in debt to each other about \$4,000,000,000, in, money in the country all told, and only about \$11,000,000,000 of all kinds of money in the world. Senator Stanford sees plainly the great need of a larger volume of circulating medium for the general good of the great mass of the people, while many others of smaller minds and less patriotism fail to see the need of more money, or oppose its increase from personal motives, as their wants are already supplied. In my opinion there is no man in this nation that could and would do more for common humanity as President of the United States than Leland Stanford. These are the views of a poor workingman who has watched Stanford's movements for forty years.

A dispatch from Chicago says: "There has been such a liberal trade in California has been such a liberal trade in California raisins that offerings are only moderate, and steadiness of values continues, though present sales are small. Other lines sell pretty well. California prunes are in good request. Peaches are in fair demand and, being scarce, it turns a little more trade to apricots. Nectarines rule quiet. Arrivals of oranges from Florida are good for this season yet when it is considered Arrivals of oranges from Florida are good for this season, yet when it is considered that arrivals from California are less than usual the supply is not heavy. Floridas, also, are preferred, though at present the demand is somewhat checked by cold weather. Californias are seiling slowly. Quotable as below: California Navels, choice, per box, \$3.00@3.50; frosted, \$1.25@1.75; California Seedlings, choice, \$2.00@2.15; do. frosted, \$1.50. ### SAN PRANCISCO MARKETS.

BAN FRANCISCO, March 17.—[Special to THE TIMES.] The wheat market showed considerable activity at the morning session of the call hoard. Sales were 6500 tons of wheat and 300 tons of barley.

The vegetable market is without change. Receipts of green stuff are increasing in volume daily and quotations are gradually decreasing. Potatoes and onions continue dull and heavy as stocks are much in excess of the demand.

steady at quotations. Eggs are weaker, owing to large supplies and possible receipts of further Eastern stock.

The fruit market continues dull and depressed. Oranges and apples are drugs on the market and prices are established to suit haves but buyers.

Dried fruit is without change and there is little doing.

RAND, McNALLY & CO.'S ONE-VOLUME

... and GAZETTEER!

A Condensation of the Encyclopedia Britannica, Chambers's Encyclopedia, etc., with the addition of much original matter treating of

Illustrated with eighty full-page colored maps and nearly two thousand engravings.

AMERICAN SUBJECTS.

1891.

SUMMARY :

EVER before has there been offered to the public a book of reference approaching this in completeness, compactness, or cheapness. It contains 720 pages of encyclopedic information concerning all branches of knowledge, comprising, in a condensed form, stripped of unnecessary verbiage, the very cream of the Encyclopedia Britannica and the latest edition of Chambers's Encyclopedia, with the addition of a great many American subjects found in neither of the larger encyclopedias.

larger encyclopedias.

Besides being a comprehensive gazetteer of universal knowledge, it is also a complete A tias of the World, containing eighty full-page maps. Some idea may be gained of the magnitude of this wonderful work. Some idea may be gained of the magnitude of from the following table:

Number of Pages.	Size of Page.	Total Number of Pages.	Number of Words.	Number of Subjects.	Total Length of Columns, Inches.	Number of Words for One Gent.
720	7¾x10	200,800	1,700,000	18,000	21,600	3,500

80 Full-Page Maps. Free.

the whole forming the largest, latest, and most somplete Family Cyclopedia ever produced. The maps are convected to date and beautifully colored by the publishers' everytated patent-plate process to distinguish States and political boundaries. The type is new and clear, the paper good and firm.

The ordinary price of an atlas alone, containing these maps, would be at least as much as the retail price of this entire book, of which they form but a single feature.

The volume is issued in two styles: Handsomely bound in cloth, with gold title, and side stamp, \$10,00. This Splendid Book,

Indispensable to everybody—the student, the teacher, the scholar, the writer, the business man, and the intelligent citizen—will be sent, together with one year's subscription to the SATURDAY TIMES AND WEEKLY MIRROR, for the unprecedentedly low price of \$3.301 Or it will be furnished with the Daily Times one year, all for \$11.95.
